MYCITY MONITORING LITE

SIMPLE MONITORING SOLUTION FOR YOUR ITC CONTROLLERS

MONITORING
FOR SINGLE
INTERSECTION
OR THE WHOLE
CITY

Traffic Supervision. Made Easy.

MyCity Monitoring LITE is the simple and elegant solution for the fundamentals of an Intelligent Traffic System (ITS) - connectivity, overview and ease of use. In a modern ITS environment, the ability to gain a quick situational overview and to easily access the most advanced functions of your connected devices is a very valuable asset.

MONITOR
YOUR **TRAFFIC**
CONTROLLERS

MONITOR
YOUR CITY

Experience shows the need for a flexible and scalable solution which can be used for all sizes of applications - from single intersections to large city areas.

This is what MyCity Monitoring LITE can do for you; providing monitoring, supervision and management of your traffic equipment.

OPERATOR AND PLATFORM BENEFITS

OPERATOR FRIENDLY

It's easy to use from a single sign-on system that gives you access to important data and reports via a user-friendly and intuitive dashboard.

EASY ACCESSIBILITY

The micro service-based technology is built on a brand-new platform and operated by SWARCO 24/7 in a secure cloud system.

EFFECTIVE RESOURCE USE

You'll spend less time manually monitoring the city's roads leaving you free to make better use of your valuable time.

FLEXIBLE INTEGRATION

SWARCO MyCity shares & process data from different systems in an urban environment and we can act as a the aggregator of mobility relevant data sources and convert these to value-adds but also as a vendor who acts as a contractual aggregator.

MODULAR AND SCALABLE

MyCity is scalable and enables you can add new solutions when you need them or accommodate project-specific requirements.

- ACCESSIBLE ANYWHERE
- BUILT FOR USERS
- MICRO-SERVICES BASED
- SINGLE-SIGN-ON
- MODULAR & FLEXIBLE

CITY AND ROAD-USER BENEFITS

EFFICIENT TRAFFIC FLOWS

Real-time and historical data means you can take the guess work out of planning and evaluating traffic flows and keep your city's traffic flowing efficiently.

IMPROVED TRAFFIC SAFETY

Effective monitoring means faulty devices can be fixed sooner, reducing the likelihood of accidents or traffic violations.

REDUCED CONGESTION AND POLLUTION

Broken roadside devices can result in congestion and higher concentrations of vehicle emissions. Better monitoring and instant alerts mean you can deal with these scenarios sooner.

YOUR CITIES IMAGE

The quality of life in a city goes a long way to determining whether or not it attracts new businesses and more people to live and work there. A well-managed city road network, that is easy to travel around and relatively free from congestion, goes a long way to improving that quality of life.
