

# MORE SAFETY, MORE FUN EUROTHERM

EUROTHERM brings color and safety into everyday life. These preformed thermoplastic markings are versatile, resistant and provide optimal visibility, combining safety with fun.

**Life is colorful – just like a playground, schoolyard or road. This is where EUROTHERM can show its strengths.**

EUROTHERM attracts attention. Be it road markings, play areas, number games, playground trails, driveways and access roads to companies, or company logos – with EUROTHERM, they are sure to be an eye-catcher!

## COMPETENCE AND EXPERIENCE

Outstanding results are not achieved through conventional methods. This is why, internationally and together with strong partners, SWARCO Road Marking Systems is always researching and developing new solutions through test fields and practice tests.

## SAFE AND SUSTAINABLE

EUROTHERM is based on hydrocarbon resins. This prevents discolorations and the release of carbon-based hazardous substances. The raw materials do not fall within the scope of the REACH regulation. SWARCO Road Marking Systems is also part of the REPA scheme and complies with the highest recycling standards.

## EXPERIENCING PASSION

EUROTHERM is as unique as you need it to be. Your wishes and goals will guide the work of the SWARCO Road Marking Systems team. Our passion makes us a reliable partner.

## ISO-CERTIFIED QUALITY

QUALITY MANAGEMENT

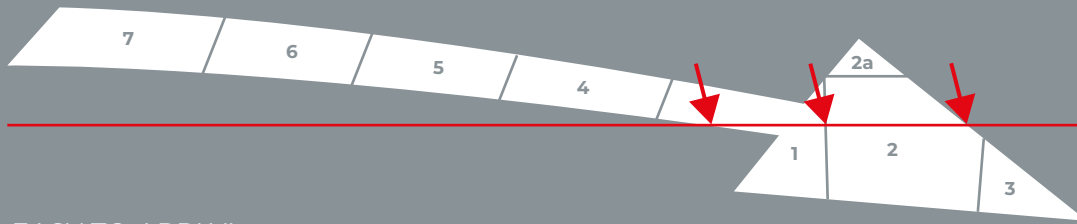

ENERGY MANAGEMENT

ENVIRONMENTAL MANAGEMENT

All materials are developed according to the latest standards and undergo comprehensive tests and assessments at a variety of testing institutes. SWARCO Road Marking Systems is synonymous with top-class safety and quality.

# SHAPING EUROTHERM TO PERFECTION

## EASY TO APPLY!

The red line shows the pictogram's final position and will help you align the markings perfectly. Each pictogram receives individual part numbers from us, and is packaged in accordance with said numbers. The material can be unpacked and aligned in one step. For easy orientation, each package comes with an application guide showing the pictogram with the different part numbers. This ensures that large pictograms can be applied quickly, without too much searching. That way, you can swiftly complete this step-by-step application with ease and precision.

Equipment: gas torch, broom, piece of chalk, and drop-on beads; primer only if necessary

The area to be marked must be completely clean, dry and free of dust and oil. Draw the outline in chalk.

If it is cool and moist, preheat and dry the substrate. Apply primer and let it flash off.

Use a gas torch to heat the entire surface of the EUROTHERM marking until it starts to bubble.

Apply the drop-on beads to the marking, ...

... clean it with the broom, and use a sharp object to check that it is securely adhered. The marking can be driven over after just a few minutes.

For optimal results, these instructions are also available on video. Just scan the QR code and you will be amazed how easy it is to apply these markings!

## THE MANY BENEFITS OF EUROTHERM

- Suitable for different surfaces and traffic areas
- Quick and easy to apply
- Ready to be driven or walked over after a short drying time
- Highly resistant to frost, snow, ice, salt and oil
- 30% premix glass beads ensure high retroreflection
- Granulates for skid resistance
