

PREFORMED THERMOPLASTIC
SWARCO PREFORMED

ON SAFE GROUND

SWARCO PREFORMED brightens up everyday life and also helps make it safer and more fun.

Our preformed markings are extremely effective on roads. Placed directly in the driver's line of sight and featuring well-known icons and symbols, they reduce risk in potentially dangerous areas. This especially helps protect more vulnerable road users and children. However, SWARCO PREFORMED also does more: The significant portion of glass beads makes the signs more reflective and visible – by day and by night, in wet conditions and in fog.

SWARCO PREFORMED is also really eye-catching away from the road. The markings can be used to create a maze in a playground, or a number snake in a schoolyard, or a logo on the approach to a company. And there are so many more options too: You can choose from a host of different colours and shapes to recreate your ideas on the ground. We are more than happy to advise you on our colourful and broad range of options. We'd like to present some of these to you in this brochure and also show you just how quickly and easily our markings can be applied.

Two small blue rectangular markings with illegible white text, positioned at the top of the image.

LIFE IS COLOURFUL AND SO IS OUR PORTFOLIO

SWARCO PREFORMED Symbols

Placing conventional traffic signs on the road as preformed markings puts them directly in the driver's line of sight and makes them impossible to overlook. Reflective glass beads make them much more visible in all light and weather conditions.

SWARCO PREFORMED Bespoke

From special symbols to company logos: Preformed markings come in many different shapes and colours and are also eye-catching features away from the road. Put your unique mark on your town square, company site or property.

SWARCO PREFORMED Playground

Learning, playing and having fun: Bright preformed markings in schoolyards and playgrounds inspire children to interact with each other and let their imaginations soar. Whatever you create – whether it's a letter maze, a number snake, a huge compass or rocket to the moon – it's guaranteed to make learning fun.

SWARCO PREFORMED –
preformed markings come in a wide
range of shapes and colours.

SWARCO PREFORMED ECO Rolls

SWARCO PREFORMED ECO Rolls represent the cost-effective solution for smaller marking repair areas. They can be used for reinstatement of markings following utility works, small scale lining work such as car parks or for safe routes to school.

SWARCO PREFORMED ECO Sheets

With a fast and easy application and great resistance to discoloration, SWARCO PREFORMED ECO Sheets are the ideal choice when designing school playground markings, crossings and roundels. We also offer SWARCO PREFORMED ECO Anti-Skid Sheets suitable for reinstatement following utility works and any decorative work that requires higher skid resistance.

QUICK & EASY INSTALLATION

Safety is a top priority – traffic signs, symbols and lines may seem commonplace at first glance, but they keep us safe on the road. Today, these symbols are an integral part of everyday life.

1

Equipment: Torch, broom, piece of chalk and drop-on material. Use a primer if necessary.

2

The area to be marked must be clean, completely dry and free of dust and oil. Draw the outline in chalk.

3

If it is cool and moist, pre-heat (thoroughly dry) the substrate. Apply primer and let it flash off.

4

Place SWARCO PREFORMED on the marked area.

5

Use the torch to heat the entire surface of SWARCO PREFORMED until it starts to bubble.

6

Apply the drop-on beads to SWARCO PREFORMED.

7

Clean the marking with a broom and use a sharp object to check that it is securely adhered. It can be driven over after just a few minutes.

The many benefits of SWARCO PREFORMED

- Suitable for different surfaces and traffic areas
- Fast and easy to apply
- Ready to be driven or walked over after a short drying time
- Extremely resistant to frost, snow, ice, salt and oil
- 30 percent premix glass beads ensure high retroreflectivity
- Special drop-on material for enhanced skid resistance and/or retroreflectivity

SHOWING THE WAY, WORLDWIDE

SWARCO | The Better Way. Every Day.

In 1969 we started out with the manufacture of tiny reflective glass beads. Today we have grown into the world's largest systems provider for road markings. Making roads safer and saving lives on a daily basis. Our high quality products and services, safely direct traffic flow from A to B, every day and night. On all roads, in any weather, and all from SWARCO.

We prepare for the future, by fusing knowledge with innovation at our Competence Center for Glass Technology and Marking Systems. So, even with smart and autonomous driving, we continue to blaze the trail of premium road markings to the world. Jump in and drive with us; we will be happy to help you find your ideal road marking solutions.
