

MOVEABLE VEHICLE ACTIVATED SIGN: MVAS

SWARCO Traffic's range of Moveable Activated Signs (MVAS) are designed for self-deployment by Local Councils in order to improve road safety and encourage safer driving speeds. SWARCO has extensive experience gathered over many years to provide a totally mobile solution. Recently upgraded, the optical output and clarity has to be seen to be believed.

Power consumption is dramatically reduced, allowing for a longer field life.

KEY FACTS

- Battery powered for up to 20 weeks
- Portable, ideal for moving from post to post
- Easy to carry and transport
- Interchangeable batteries
- Lightweight, robust design for safe handling
- Sustainable and affordable
- Local or remote data collection

- Automatic brightness control to 6 levels of dimming
- Configurable to 20/30/40 mph Speed display
- Meets all highway standards including BS EN12966
- TOPAS Registered
- CE Certified
- Patented LED Optical system

SPEED WARNING SIGNS

SWARCO's Moveable Vehicle Activated Speed Warning Signs will activate upon detection of a speeding vehicle approaching and warn drivers to slow down. They are available configurable to 10/20/30 mph or 20/30/40 mph speed displays.

DRIVER FEEDBACK SIGNS

SWARCO's range of Moveable Vehicle Activated Signs are also available as Driver Feedback Signs. These can be used to remind motorists of the speed limit by displaying each vehicle's speed on approach, with the option to send the message to speeding drivers to slow down or to thank drivers that remain within the limit.
