

1470 SERIES

AthletiCoat XTRA Field Marking Paint Concentrate

AthletiCoat XTRA is a highly concentrated, ultra-bright white field marking paint that is designed for athletic field striping and stenciling. The highly concentrated, VOC-free formula is designed to be diluted by as much as 5:1, water to paint. This allows for reduced costs associated with shipping and generates less waste.

FEATURES AND BENEFITS

- Excellent Brightness
- VOC Free
- May be diluted up to 5:1, water to paint
- Reduces waste and shipping costs
- Safe to use on natural grass and dirt fields
- May be applied by spray, roller or brush
- Easy cleanup

TECHNICAL DATA

Gloss/Sheen (85°)	< 5 (Flat/Matte)
VOC Content (g/L)	0
Viscosity (Krebs Units)	103 (±3)
Density (lbs./gal)	14.4 (±0.3)
Weight Solids	72.3%
Volume Solids	52.4%
Coverage (undiluted, 1.5 mil dry film, ft ² /gal)	550

AVAILABLE COLORS

- White
- Custom colors available upon request (minimum orders may apply)

PACKAGING

- 2 Gallon Containers
- 5 Gallon Containers

1470 SERIES

AthletiCoat XTRA Field Marking Paint Concentrate

SURFACE PREPARATION

For best results, surface should be dry or have negligible moisture present.

APPLICATION

- For best results, apply when temperatures are between 40°F and 100°F.
- Apply with spray or roller equipment.
- Minimum recommended dilution: 1:1 (water to paint).
- Maximum recommended dilution: 5:1 (water to paint).
- Do not leave water or water mixed with non-subsiding cleaner for more than 24 hours in spray equipment. It is recommended to use a mixture of glycol solution and water when storing spray equipment longer than 72 hours.

DILUTING

Thoroughly mix undiluted paint prior to diluting. Minimum recommended dilution ratio is 1:1, water to paint. Maximum recommended dilution ratio is 5:1, water to paint. Only dilute enough material for the specific application. Diluted paint may "hard settle" after a period of time, depending on storage conditions.

INTENDED USE

This product is designed as a temporary marking for grass, dirt or artificial turf athletic fields. May also be used as a temporary marking for parade routes, and is easily removed with pressure washing. It is not designed as a permanent marking, and should therefore not be used as a permanent marking on tennis courts, asphalt or concrete.

MIXING

Product will appear very thick in the bucket. Upon mixing, it will flow more easily, and can be transferred to a larger container for dilution. Stir well when diluting to ensure a homogenous mixture.

ENVIRONMENTAL

- Dry paint chips are non-toxic
- VOC-Free formula will not damage turf

CLEANUP

Clean all equipment with warm, soapy water.

SAFETY PRECAUTIONS

Keep material and buckets out of reach of children. Do not intentionally inhale mist or paint vapors.

SHELF LIFE

Best used within 3 months of manufacturing date. Extra mixing may be required for material that has not been used within this time frame.

STORAGE

Store undiluted material in the original, tightly sealed container in a cool, dry place.

WARRANTY

Colorado Paint warrants to the purchaser, for six months from the date of manufacturing, that this product shall be manufactured without defects when applied according to Colorado Paint Application Instructions. This limited warranty covers material replacement only. Excluded from coverage is labor, any damage to the application surfaces or any failure of the coating caused other than by defects in the material.
