SWARCO MYCITY MONITORING

SWARCO MYCITY MONITORING IS A MODERN AND SCALABLE MONITORING SOLUTION FOR SINGLE INTERSECTIONS AND LARGE CITIES.

It resides on SWARCO MYCITY – the modular urban traffic management platform – and succeeds the well-established systems "Omnia Basic", "SWARCO CLOUD" and "topic". These are the features:

- Monitor of alarms, devices and equipment
- 24/7 operated cloud-based solution by SWARCO
- Multi-device support to provide access from mobile and tablet
- Standardized system with customization possibilities to meet customer needs
- High number of integrations to external systems and different traffic light controller (TLC) interface standards
- Direct access and control of TLCs
- Advanced features for all SWARCO controllers

SWARCO | The better Way. Every Day.

SWARCO is a growing international group providing the complete range of products, systems, services and solutions for road safety and intelligent traffic management.

With five decades of experience in the industry, the corporation supports the growing mobility needs of society with turnkey systems and solutions in road marking, urban and interurban traffic control, parking, public transport, infomobility and street lighting. Cooperative systems, V2I communication, electromobility, and integrated software solutions for the Smart City are latest, future-oriented fields in the group's portfolio.
