Let's welcome your customers in the office.

Business parkers plan and work out their own arrangements

For Your Customers
Companies benefit from easy-to-handle self-management for their parkers, guests and visitors (using LPR, employee batches or other data carriers, or different access media for different groups of parkers)

Free: 5 | Reserved: 4

Keeping parkers' convenience in focus

For Your Customers
Convenient car park entry and exit with a registered media of identification, e. g. granting VIP guests and visitors access to restricted areas or nested car parks

## EV-charging for office workers adds value to the parking service

For Your Customers
Parkers have their car charged and ready for the drive home

Management made easy: full integration of parking services into the facility management system

For Your Customers
No need to juggle with separate systems - everything is fully integrated

COMPANY

P

For You
Full control of the car park at less effort

Self-service for business customers to manage their own business parking. Contract parker management becomes much easier with the option of outsourcing standard tasks like contract management to business customers and their parking users

For You
Convenient control of access to parking and building areas

License plate recognition enables smooth entry and exit, different access media offer a variety of access options

For You
Full own revenue and flexible expansion options for own EV-business

Convenient all-in-one management of parking and EV-charging (tariffs, reports, monitoring)

For You
Comprehensively manage and organize the car park with ultimate flexibility - also suitable for multi-site office facilities and business parks

Powerful Control Center for comprehensive and efficient parking operation of all car parks. From monitoring and control of parking devices, license plate review to perfect online customer support and staff task management.

More than 40 years of tomorrow

For more than 40 years, we have been changing the world of welcoming people, based on the principle that the true driver of innovation is in the end-customer and their behavior. Offer your customers a convenient journey to let them feel safe and welcome – it's a great way to turn anonymous guests into recurring customers!

▸ You can fulfil your customers' essential needs for convenience and safety in all situations
▸ You will benefit from our hand-in-hand partnership with clients and partners
▸ Our digital platform provides you with the parking solution, all required open interfaces and easy integration possibilities that perfectly suit your needs in a simple, secure and sustainable way
▸ The solution lets you benefit from a new level of infrastructure connectivity: end customer activities and their booking and payment behavior provide new sources of valuable business data
▸ These data provide the basis for your analytical and financial reports to ensure accurate business development planning and supporting marketing strategies that help you maximize your revenues
▸ SKIDATA is where you are: with 27 subsidiaries and distributors in 100 countries, we support you with quick and reliable service.
▸ Consulting, implementation and service: all from a reliable single-source provider.

Subscribe to your parking management solution

The all-in-one parking management solution that perfectly suits your needs is covered by a transparent and easy-to-plan monthly fee: no initial capital investment needed, no hidden costs. Instead of high up-front investment (CAPEX), you can rely on full transparency and predictable costs. The monthly fee (OPEX) covers everything: all software installations, licenses, updates and maintenance operations – making sure your system is always up to date and conforms to the highest security standards.

What can we do for you to be prepared for the future of parking in tomorrow's office buildings?
