

Ticket Advanced Solution

The comprehensive, flexible parking system for greater added value

The Ticket Advanced parking system by SKIDATA is the ideal ticket-based solution that offers a broad variety of value adding services for you and your customers. It can get flexibly designed to meet your targets for revenue generation, high customer convenience, extra security standards and maximum automation of operational processes.

- Our comprehensive ticket-based solution provides added value to all your customer groups, fully flexible to meet all of your and your customer's needs
- Supports license plate recognition in combination with tickets for maximum security, parking guidance systems and single-space monitoring for customer convenience
- Enables complementary services, such as validated parking or central operations control
- Ideal for city garages, airports, convention centers, stadiums and shopping malls

Comprehensive

High added value

Flexibel

The comprehensive high-end parking system

Perfectly tailored to your customers' needs

Not only typical short-term parkers enjoy a smooth access by issuing a paper ticket, also contract parkers can easily enter your car park with their employee or customer cards.

Add Parking Guidance to your system, an easy-to-follow guidance solution with integrated single-space monitoring that directs your parking customers to the next empty stall in a quick, secure fashion.

With an added sweb Validate option your parking customers can also have their parking validated at nearby shops.

The innovative sweb mobile Pay offers your customers a cashless and touchless payment experience with their own mobile phone (no App, no registration required).

Finally, integrated license plate recognition allows your customers to enjoy the benefits of your parking facility with the added ease of smooth, free-flowing entry and exit.

Meeting your requirements

The Ticket Advanced Solution adjusts readily to your requirements. It allows you to add on all the services you need or want for your business, allowing you to fully custom tailor the system to your individual requirements.

Whether with integrated marketing channels or facility controls, data analysis or support of a wide range of data carriers – the Ticket Advanced Solution ensures the highest possible added value for you.

What is more, its visual appearance lets it blend in perfectly with any modern environment. SKIDATA Automated Payment Machines are easy to use and come in a high-quality design. They support a wide range of payment options, and they provide a high cash and ticket storage capacity in addition to a long overall product life cycle.

The license plate recognition system allows you to raise the level of security and ticket fraud prevention or reduce the resources required for handling instances of ticket loss.

Flexible add-on services with high added value

sweb® Validate

To grow your garage utilization level and turnover, you can sell parking validations to nearby business partners via the sweb Validate web service.

sweb® Control

You can control and monitor your facilities locally, centrally or via mobile connections using sweb Control.

sweb® Analyze

In addition, the centralized data analysis and business intelligence solution sweb Analyze allows you to optimize your business efficiently and transparently.

» The system's configuration is tailored precisely to your individual requirements.

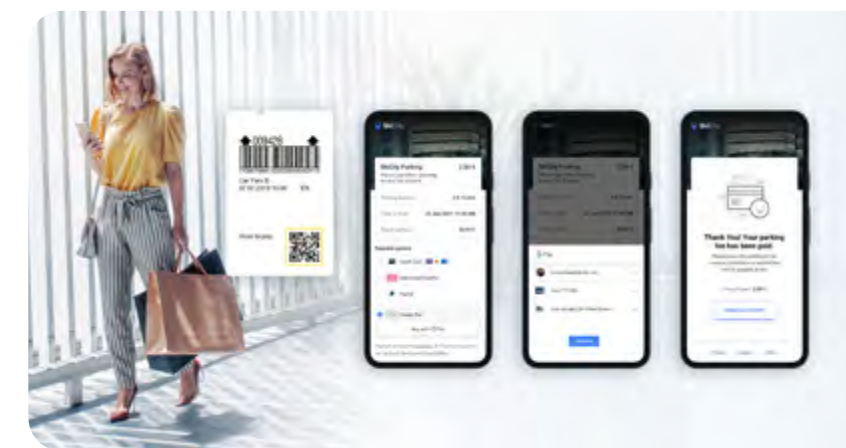

» Updates and add-ins for the SKIDATA system are usually applied via remote maintenance.

» If required, SKIDATA will seamlessly integrate any additional systems or your existing IT infrastructures into the solution.

Secure cashless payment via smartphone with sweb® Mobile Pay.

To pay before leaving, short-term parkers simply scan the QR code on their ticket using their smartphone camera. There is no need for an extra app, as sweb Mobile Pay will automatically direct them to the web page for online payments, where they are already registered. Once the payment transaction is complete, they can use the ticket to exit the parking facility. As a result, the need to wait in line at an attended or automated pay point is effectively reduced, as is your operational effort. This is because you have to spend fewer resources on things like emptying, refilling and maintaining Automated Payment Machines. Sweb Mobile Pay integrates easily and instantly into existing parking systems.

SKIDATA Software Package

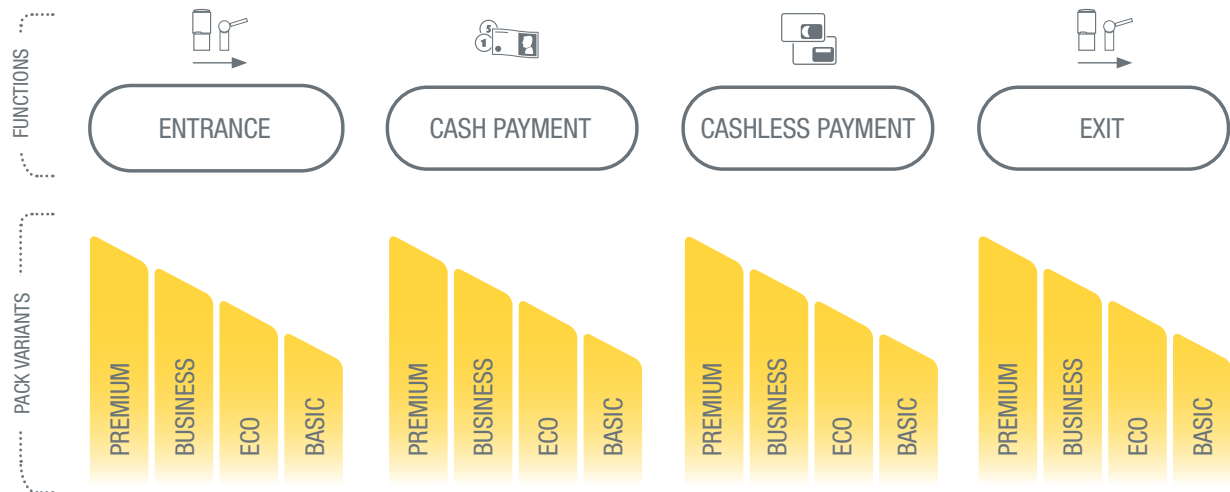

The Ticket Advanced Solution is your ticket to making your parking facility instantly ready for the future. The software package is immediately ready to use.

It contains all important component, e. g. sweb Mobile Pay that makes paying easier than ever before. No cash, no cards, no long queues at the APM: Customers simply complete the payment process online via their smartphone.

SKIDATA hardware packages - various options to match your needs

A variety of functionality and flexible combination possibilities: with SKIDATA Packs, you can individually decide which package best suits you. From the basic equipment to the premium version, you are free to choose: You do not have to assemble any components - you will receive a complete package tailored to your needs. This gives you full flexibility in all four areas (entry, cash payment, cashless payment and exit).
